SKANDER WALI

FINAL-YEAR COMPUTER SCIENCE STUDENT · CYBERSECURITY

Hammam Sousse, Tunisia · skanderwali@protonmail.com · LinkedIn · GitHub · +216 93 152 805

SUMMARY

Final-year Computer Science student at ISITCom focused on offensive security, vulnerability analysis, and security tooling. Hands-on experience with CTFs covering web exploitation, binary exploitation, reverse engineering, digital forensics, cryptography, and network analysis. Develops security-focused tools and automation using Python, C/C++, and Linux, with additional experience in secure web development and full-stack applications. Seeking a cybersecurity PFE internship in offensive security, application security, security engineering, or SOC operations.

EDUCATION

Bachelor's Degree in Computer Science — ISITCom · Sept 2023 – Present

Institut Supérieur d'Informatique et des Technologies de Communication, Hammam Sousse, Tunisia

- Coursework and practical study covering programming, algorithms & data structures, computer networks, cryptography, operating systems, Linux, databases, and software engineering.

CYBERSECURITY EXPERIENCE

Independent Security Practice & CTF · 2024 – Present

- Solve CTF challenges across web exploitation, binary exploitation, reverse engineering, digital forensics, cryptography, and network analysis.
- Analyze security problems involving vulnerabilities, encoded data, network traffic, compiled binaries, and filesystem artifacts using scripting and security tools.
- Develop Python automation scripts for reconnaissance, data processing, brute-force testing, packet/log analysis, and repetitive security workflows.
- Practice network enumeration, service discovery, vulnerability assessment, and penetration-testing techniques in controlled lab and CTF environments.
- Use Linux, Bash, Python, C/C++, Git, Wireshark/tshark, and security tooling to investigate and reproduce technical security challenges.

SECURE WEB DEVELOPMENT

Full-Stack Projects — Independent

- Built full-stack web applications using React, JavaScript, REST APIs, and SQL/NoSQL databases, applying security-conscious development practices.
- Worked with application logic involving authentication, input handling, API communication, and database interactions.
- Used Git/GitHub for version control and structured development workflows.

CYBERSECURITY PROJECTS

RootLab · Next.js · TypeScript · Tailwind CSS

- Built a browser-based cybersecurity learning simulator centered on terminal-first offensive-security scenarios; designed simulated workflows involving host/service enumeration, exploitation, privilege escalation, and flag capture in a safe deterministic environment.

ThreatCanvas · React · TypeScript · Vite · Tailwind CSS

- Developed an interactive cybersecurity education platform for visualizing simulated malware attacks, attack chains, network relationships, and defensive strategies; implemented MITRE ATT&CK; mapping, process trees, timelines, network graphs, and activity logging.

MetaScan · HTML · CSS · JavaScript

- Developed a browser-based digital forensics and image-analysis tool with EXIF extraction, binary analysis, magic-byte inspection, entropy calculation, string extraction, steganography detection, GPS analysis, and CTF flag detection; processing is client-side.

Crypto Toolbox · Python · Rich

- Developed a command-line cryptography toolkit with 30+ encoding, cipher, hashing, and analysis utilities, including frequency analysis and heuristic cipher identification using character-set, entropy, Index of Coincidence, and chi-squared analysis.

TECHNICAL SKILLS

Cybersecurity: Web Security · Penetration Testing · Vulnerability Assessment · Binary Exploitation · Reverse Engineering · Digital Forensics · Cryptography · CTFs
Programming: Python · C · C++ · JavaScript
Systems & Networking: Linux · Bash · Networking · Network Enumeration · Packet Analysis
Web / Software: React · Vite · HTML · CSS · REST APIs · Git · GitHub · Docker
Databases: PostgreSQL · MongoDB · SQLite
Security Tools: Wireshark · tshark

LEADERSHIP & ACTIVITIES

- Technical Manager — Securinets ISITCom · 2024–2025 — Contributed to the technical coordination of cybersecurity activities within the university security club.
- Organizing Team Member — Green Health Challenge Hackathon · 2025 — Contributed to the organization and technical coordination of a student-focused hackathon.
- Participant — Nuit de l'Info · 2025 — Participated in the national student software-development challenge.

CERTIFICATIONS & LANGUAGES

DataCamp: Python Fundamentals (2024) · Git Basics (2025) Languages: Arabic (Native) · French · English
